aid in increasing the safety of the public and in preventing accidents to employees by shifting the responsibility for injuries under the common law rule from the shoulders of the employees to the shoulders of corporations.

The comparative number of failures in Iowa, Kansas and Nebraska quoted in the Beatrice debate was accidentally dropped out of the type of the morning edition, but appeared correctly in the next edition as follows:

Number of failures in Kansas 1889-1892, \$929,000 00. Number of failures in Iowa 1889-1892, \$579,392 00. Number of failures in Nebraska 1889-1892, \$1,578,718 00.

The number of failures in Kansas and Nebraska for the first six months of the present year was published editorially by THE BEE on July 8-the day after the debate-as follows:
